Dear Applicant,

In entering The Temple, you place yourself in line as one who seeks to enter the Path. Life will bring you many opportunities, but the opportunity that The Temple brings to you is one that none other can replace. If you grasp it and seek to know its hidden values, much will unfold to your consciousness. If you knock, inner doors will be thrown open, but you must seek, must knock, and must eat of the Spiritual food placed before you, else your entrance into The Temple will prove worse than useless.

We may give, you may receive, still unless you respond by doing the work prepared for new students, that which you receive will become veiled and we shall not be able to assist you. That work sows the seeds in the Mental Body which later spring forth into a new consciousness.

If you seek an enlarged Understanding, one that will make Life's Mysteries clearer to you and reveal a fuller Love, a finer perception of Truth, a greater Life than you have ever known, then reach out your hand and accept. Study the great Truths the Masters have placed in our keeping. Then use them. Prepare the lessons as planned for you, and send your answers to the questions submitted.

There is not one unimportant step that you are asked to take. You will then find that every such effort will unfold a new perception. One day, to those who have built into their lives the foundation principles revealed through the course of study prepared for them, new perceptions will unite, and a Great Light will point the Way to Initiation.

The Great Master said, "Thou hast been faithful over a few things, I will make thee ruler over many things." Do not forget the "little things," the small but necessary steps. They will eventually place, or remove from place, the Aspirant. They will either open or close the Doors leading to the Inner Temple wherein God's Hand unveils the Mysteries.

May the Light of the Lodge radiate its guidance before you.
